Internet Investigation

This project has received funding from the European Union's Internal Security Fund – Police Programme

Key Information

Internet Investigation

The internet plays a crucial part in most modern crimes. Gathering Open Source Intelligence (OSINT) and connecting the dots from various data sources is critical in supporting investigations. The Internet Investigation group collaborates to share best practices, ideas and insights from many experienced practitioners from around the EU. The Internet Investigation TIG is headed by a forerunner group that has helped chair, Natalie van de Waarsenburg, set this year's priorities.

Priorities 2021/2022

- A **training search tool** to allow OSINT experts to identify and review various training courses available for practitioners in Europe.
- A **list of tools and solutions** that EU LEAs are actively using in operational environments.

Benefits of Joining

Engage with expert colleagues across Europe via the ENLETS Messenger Service

Collaborate on **common challenges**

Participate in expert-led training and workshops for **free**

Join regular meetings - learning from others and sharing your **best practices**

Contribute to the Internet Investigations ecosystem

Express your views and opinions on the European stage

Gain access to Industry and Research partners through ENLETS

Discover opportunities to participate in EU-funded projects

Provide inputs to policy recommendations submitted to the EU

Meet colleagues face-to-face in bi-annual physical meetings
